Generated At: 5/22/2026, 4:37:09 PM

Task Description

Analyze the website SEO and create a plan for keywords, on-page SEO, technical SEO, AEO, GEO, and LLM optimization.

SEO Summary

The website should be improved through keyword optimization, on-page SEO, technical SEO fixes, content planning, AEO, GEO, and LLM-focused optimization.

Target Keywords

- IT services in Vapi
- website development company
- SEO services
- branding agency
- software development company
- social media marketing services

On-Page SEO Suggestions

- Optimize page titles with primary service keywords.
- Add clear meta descriptions for all important service pages.
- Use proper H1, H2, and H3 heading structure.
- Add internal links between website, app development, SEO, branding, and social media service pages.
- Add service-specific call-to-action sections.

Technical SEO Suggestions

- Improve page loading speed.
- Compress images and use modern image formats.
- Create and submit sitemap.xml.
- Check robots.txt configuration.
- Fix broken links and 404 pages.
- Make sure the website is mobile responsive.

Content Strategy

- Create blog posts around website development, SEO, branding, and digital marketing.
- Add case-study style content for completed client work.
- Create FAQ sections for each service page.

- Add location-based landing pages for target business areas.

AEO Suggestions

- Add direct question-answer content for common client queries.
- Use FAQ schema on service pages.
- Write short answer blocks for voice search and answer engines.

GEO Suggestions

- Optimize Google Business Profile.
- Add local keywords such as Vapi, Gujarat, and nearby service areas.
- Collect client reviews and display them on the website.
- Add NAP details: name, address, and phone number consistently.

LLM Optimization Suggestions

- Write clear service descriptions that AI search engines can understand.
- Add structured company information on the website.
- Create comparison and explainer pages for services.
- Use natural language FAQs that match user search intent.

Next Steps

- Perform full website SEO audit.
- Prepare keyword research sheet.
- Fix technical SEO issues.
- Update service page content.
- Create 30-day SEO content plan.

CEO Review

Decision: approved

Feedback: SEO draft looks good. Approved for final report.
